

REMARKS

The Examiner has required restriction in the above-identified application as follows:

Group I: Claims 2, 4-8, 13, 19, 21-23, (fillet not
adhering); and

Group II: Claims 24-35 (fillet lightly adhered).

Applicants respectfully submit that examination of all currently pending claims would not pose an undue burden on the Examiner. Section 803 of The Manual of Patent Examining Procedure states that “[i]f the search and examination of an entire application can be made without serious burden, the examiner must examine it on the merits, even though it includes claims to independent or distinct inventions.” Applicants therefore respectfully request examination of all currently pending claims.

It is Applicants’ understanding that the election of species requirement is made for the convenience of the Examiner and that a reasonable number of species will be allowed upon a determination that the elected species is patentable.

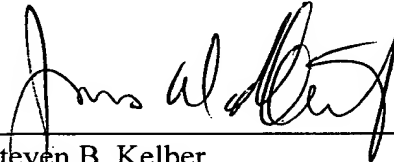

Applicants note that new Claim 36 is generic to both species.

Applicants submit that the application is now in condition for examination on the merits. Early notification of such action is earnestly solicited. Should the Examiner have any suggestions to place the application in even better condition for allowance, Applicants request that the Examiner contact the undersigned representative at the telephone number listed below.

In light of the above, Applicants submit that this application is now in condition for allowance and therefore request favorable consideration. If any issues remain which the Examiner feels may be best resolved through a personal or telephonic interview, the Examiner is respectfully requested to contact Applicants' counsel, James M. Heintz at (202) 861-4167.

Respectfully submitted,

PIPER RUDNICK LLP
